

A1

Figure 2 shows the method according to the present invention for exchanging data between a service provider and terminal devices.

On page 4, line 15, change "corresponding" to - -correspond- -.

- -What Is Claimed Is:- -.

Please cancel original claims 1-7 and please cancel substitute claims 1-7, without prejudice.

Please add the following new claims:

via interfaces situated in the infrastructure, adapting data in the standardized format to the data processing capabilities of the data users.

9. (New) The method according to claim 8, further comprising the step of carrying-out a transmission between the infrastructure and the data users via a

digital mobile telephone network.

10. (New) The method according to claim 8, further comprising the steps of:
transmitting request data from the data users to the infrastructure;
and
selecting the data service and at least one of the interfaces as a
function of the request data.

11. (New) A terminal device for a reception of data from an infrastructure, the
terminal device having specific data processing capabilities for processing the
data, the infrastructure making a data service available in a standardized format,
the infrastructure including interfaces via which the data in the standardized
format is adapted to the data processing capabilities of the terminal device, the
terminal device comprising:

means for transmitting a request signal to the infrastructure via
which data is requested from the infrastructure and with which information
concerning the data processing capabilities is transmitted via the terminal
device to the infrastructure.

12. (New) The terminal device according to claim 11, further comprising means
for exchanging data with the infrastructure via a digital mobile telephone
network.

13. (New) The terminal device according to claim 11, wherein the terminal
device is a car radio with supplementary functions.

14. (New) The terminal device according to claim 11, wherein the information
concerning the data processing capabilities of the terminal device includes a
terminal device identifier.
